**PROBLEM TO BE SOLVED:** To provide a gas barrier container being transparent and excellent in gas barrier properties and being in the form of a bottle, a cup or another shaping. **SOLUTION:** A bottle having gas barrier properties and made from a transparent polyester/polycarbonate composition, more particularly a bottle or a container made from a transparent polyester/polycarbonate composition prepared by melt-kneading a polycarbonate and a polyester in the presence of a transesterification catalyst and/or a proton acid and having gas barrier properties and mechanical strengths is provided. The transparent polyester/ polycarbonate composition used is a composition having a single glass transition point and a single-phase morphology.
